Mospital board lets tower, sewerage bids

Decision to publish notices and treasurer or vice-presiafter H.J. Blackledge, administrator, told Hancock General Hospital trustees that the need for a new water condensing tower for the cooling system is urgent. He explained that the unit has lasted three years past its normal 'life expectancy' of five years, adding that inspection of the structure convinced him that 'one good

blow' could displace it. The board was in unanimous agreement on the issue, and also voted to advertise for bids on sewerage at the same time, scheduling opening of these bids at a special meeting at 7 p.m., Aug. 6.

Bill Frisbie, attorney for the group, asked that the adoption of new by-laws also be held for further discussion at the special meeting to allow him time to further examine proposals. One slight change was approved. Section 5, formerly reading 'all checks must be signed by the administrator

to bidders were accelerated dent' was amended to allow the signature of any designated board member, instead of only the vice-president.

The docket was read by John Rutherford and a net output of \$19,450.06 approved. Agreement was also reached to list \$42,334.96 of unpaid bills, some dating back to 1965, as uncollectable to clear the way for use of the new computer. Rutherford pointed out that most of these accounts were state aid cases, of which welfare payments did not match total costs.

Rev. Charles Johnson pointed out that every hospital has a certain number of charity patients, adding that Hancock General's percentage is far below that of hospitals in neighboring towns. Frisbie added that some of the accounts have been put out for collection by Medical Credit and that entering bills in yearly bad debt files does not mean that they can not be entered upon the books if paid.

Coinciding with finish-up operations of first phase construction on the biggest dovelopmont project in the history of Hancock County, the county's Board of Supervisors went on record Monday as approving tho \$2,600,000 bond issue to finance second phase developments at the airport and port and indus-

"If the airport project does not proceed on schedule it will not be ready to coincide with will thereby lose out to some ed driving time from downtown New Orleans."

Hill remarked in conclusion, Hancock County cannot afford to waste the taxpayers' money by failing to protect the investment already involved in this greatest project our people have yet undertaken.

'Official sources estimate that within five years, approximately 13,000 jobs will result from the expected industrial installations if we proceed on schedule with the project."

Under a \$1.75 million bond issue passed in 1966, the first phase work was realized with no additional taxation to the people of the county.

This new bond issue will be the same manner to embark on phase two, the vital step forward that will bring both sites to a point of readiness for occupancy and use. Again, no additional taxes will be imposed on citizens as the stage is set for activities that will bring solid dollar returns on their multi-million dollar investment.

During an interview this week, Charles Hill, director of the port and harbor commission stated "now that contracts on phase one near completion, it is essential that phase two proceed without delay. Two very good prospects interested in the West Hancock County Harbor and Industrial Area will not come to a decision to locate at that site until they have a firm commitment from us as to the schedule of installation of the railroad and rolated facilities mooded. These facilities are included in this stage. One operation would employ approximately 750 people and the other 250. Think of what one thousand now jobs would mean to our oconomy. Delay coots

Hill continued, "in rogard the completion of I-10 and we to the airport site, under phace one it will be only partially extent on our greatest advant- complete, and phase two fundo age -the fact that our airport are needed for lighting, adwill be 45 minutes uninterrupt- ministration building, taxiwayo, aprons, and completion of runways to 6,500 feet in order to handle the newest typo jot air-

"We have talked to three airlines and all have omhibited interest in bringing air froight to our airport. Two are infornational in scope. Wo have already m a d e application through the International Trado Division of the Mississippi Marketing Council for classification as a port of ontry."

Port and Harbor Commission President Donald Landry declared "this will be only tho second phase of a long rango plan, and is the most escential phase to make the project basically operational. Failure to olds to out coold moment time would ronder work alroady accomplished useless, and tho nearly two million dollars wo people of Hancock County have invested would be wasted.

Wayne Alliston, county health officer appeared to raise the question of sanitation on Jackson Ridge, pointing out that there have been as many as 30 tents on the picnic grounds. on weekends, when in the past only one or two were seen. Elliott referred him to Eugene Ladner, county superintendent of education, reminding Alliston that this is 16th section land. He added that Jaycees and several other groups have begun action in the matter, but suggested that it might be a good idea to test the water in the heavily populated Clermons Harbor area for possible pollution.

A letter from John F. Mc-Elligott commending the board for action in removing the Caesar-Necaise road from the state secondary highway system, was read by Elliott. At that time Benvenutti was asked to do whatever is legally necessary to obtain a \$2,700 rebate resulting from removal of Highway 69 from state maintenance.

dollar Port & Marbor Dovolopmant Bond Issue

Seeing is Believing-2.25 Million Dollars in Port, Harbor & Airport Work Presently in Progress and No Increase in Taxes-This is Fact

RUMORS-HERE ARE THE FACTS:

Port & Harbor Development Bonds will be funded by gasoline taxes accruing under Sections 8514 & 8515 of the Miss. Code-there will be absolutely no increase in your ad valorem taxes.

Special port legislation does not permit such funds to be used to build schools, hospitals, local roads and libraries-funds for such purposes must come from other sources.

3. Port & Harbor funds have been wisely expended-see for yourself by driwing out to the 590 acre airport site on Texas Flat Road and the 2, 200 acre industrial site on Mulatto Bayou.

4. To complete the 6,500 foot jet airport will require over \$1,000,000 in federal matching funds-almost one-half million in federal funds have ALREADY BEEN ALLOCATED. You should have as much faith in your county as the federal government which will audit these expanditures.

5. All contracts for public works must be advertised and publicly opened and the law requires that the contract MUST BE AWARDED TO THE LOWEST AND BEST BIDDER.

6. All expenditures by the Port & Harbor Commission are public information and any citizen has the right to examine the minutes and attend any meetings of the commission.

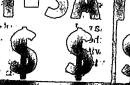

7. The Port and Harbor Commission, and the Board of Supervisors have worked hard to develop this program, sought and received expert advice, and we believe our program is second to none anywhere.

It takes strength and purpose to do a big job

The primary purpose of Electric Power Associations is to furnish low cost, dependable

electric power to every part of Mississippi.

But greater goals lie ahead. Within ten years,

the demand for electric power will double.

New rural industries, expanding population,

growing business will require more abundant
